

SYED MUHAMMAD UZAIR

0314-5068487 | smuzair14cse@gmail.com | [LinkedIn](#) | [Github](#)

Portfolio: <https://iam-uzair.vercel.app>

Full Stack Engineer building production-grade backend systems, secure authentication flows, async processing pipelines, and AI-integrated applications (RAG, LLM orchestration). Experienced designing scalable APIs and shipping end-to-end – from database schema to deployed infrastructure – across freelance and internship work.

SKILLS AND TECHNOLOGIES

Languages: C, C++, Javascript, Typescript, Python

Frontend: HTML, CSS, Tailwind-CSS, React, Next.js

Backend: Node, Express, MongoDB, PostgreSQL, Prisma, Redis

LLM Engineering: RAG, Vector DBs, Groq API, Whisper, LLM Pipelines, Prompt Engineering

Others: Git, Vercel, Stripe, CI/CD

EXPERIENCE

Full Stack Developer Intern

July 2025 – October 2025

Triosaf Technologies

- Engineered full-stack features across 15+ REST API endpoints and resolved 20+ front-end/back-end defects, improving application stability.
- Collaborated with a 4-person engineering team through code reviews and Git-based version control.

Full Stack Developer

November 2025 – Present

Independent / Freelance

- Delivered full-stack web applications for 3+ clients, owning the complete software development lifecycle.

PROJECTS

NexaSupport – AI Customer Support SaaS

- Built a SaaS platform deploying a branded AI chatbot on any website via a single embed script, requiring zero backend work from clients.
- Engineered a RAG pipeline – chunking, embedding (HuggingFace BGE), and Qdrant vector search – for grounded, hallucination-resistant answers with real-time streaming via Groq.
- Secured the platform with OAuth 2.0, HTTP-only sessions, and Redis rate limiting across endpoints.
- Stack:** Next.js | TypeScript | Prisma | Qdrant | Groq | OAuth 2.0

YouTube Shorts Converter – AI Video Pipeline

- Built an end-to-end pipeline turning long-form video into short clips: yt-dlp download → Groq Whisper transcription → LLM highlight detection → FFmpeg clipping.
- Ran the pipeline as async background jobs with real-time status polling; integrated Stripe billing and JWT auth with per-device session revocation.
- Stack:** Next.js | Express.js | PostgreSQL | Prisma | Stripe | Whisper | Llama-3.1

MedocBills – Healthcare RCM Platform

- Shipped a live healthcare billing site with SEO architecture and career listings.
- Implemented backend authentication, an admin dashboard for job postings and candidate applications, and an embedded AI support chatbot for automated visitor queries.
- Stack:** React | TypeScript | Vite | Node.js | Express.js

EDUCATION

University of Engineering & Technology, Mardan

BS Software Engineering

SOFT SKILLS

Communication | Team Collaboration | Critical Thinking | Time Management | Adaptability
